Credit cards are not billed until the coating work is complete and the parts are ready to return ship.

Shipping: Swain Tech uses UPS to return ship parts. Return shipping cost are added to the invoice. Return shipping cost are based on size, weight and destination of the package and cannot be calculated until the order is complete, boxed up and ready to return. Parts are shipped via UPS ground unless the customer request expedited UPS shipping. If you want the package to be insured, please enter the desired insurance amount for your shipment here: _____

Prices listed for internal engine parts assume clean and fully disassembled standard sized parts. Pistons need to be sent without wrist pins, rings or pin clips. Cylinder heads need to be disassembled, but send the loose valves along with the heads. A head gasket should be sent so we can use it as a template for masking.

Due to the tremendous variation in exhaust parts, we can only provide estimates prior to the processing of the parts. No exact price is determined until the job is complete on exhaust parts. The size, masking and process time are the most significant factors in pricing for exhaust parts. Estimates listed on our web site are fair estimates assuming the parts are in good condition and standard sized.
